

Impact of Pupil Premium Funding.

Pupil premium funding was introduced by the Government in April 2011. Schools were allocated a proportion of funding in order to close any gap in achievement and improve outcomes for children on free school meals, looked after children and those children from families with parents in the armed forces.

The following data will highlight the key indicators of achievement of pupil premium students against non-pupil premium by taking into account the overall measure of 5A*-C including English and mathematics, capped point score, value added and EP in English and mathematics.

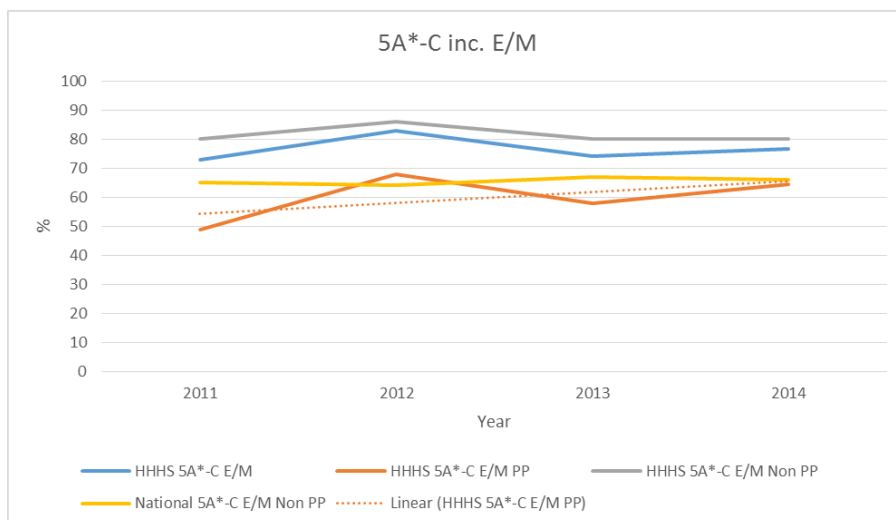

This report will be updated when RaiseOnline is published in December 2014 and then when validated data is published later in 2015.

Attainment Measures

Threshold measure

Since the pupil premium was introduced in 2011 the gap has closed between pupil premium students and non-pupil premium students. The overall trend shows that over the 3 year period the within school gap has closed by 9%.

The 5A*-C measure for pupil premium students is now almost matching the national average for all students and is now only 9% lower than the national average for non-pupil premium students.

Since 2011 the within school gap at Hawkley Hall has been reduced by over a third for pupil premium students compared against non-pupil premium students.
