

KEY KNOWLEDGE

The United Kingdom is a country of western **Europe**. It is made up of four parts: **England, Scotland and Wales**, and **Northern Ireland**. The country's full name is the United Kingdom of Great Britain and Northern Ireland. 

Britain is an island country and the surrounding sea gives it a varied climate. We never know what the weather will be like from one day to the other. It can be sunny one day and rainy the next. 

As we have such a variable climate changing from day to day, it is difficult to predict the weather. In general we have **warm summers and cool winters. Our summers are cooler than those on the continent, but the winters are milder.** 

The types of jobs people do has changed. In 1800 most people would have been employed in **primary industries**. Most people worked on farms. Nowadays, due to increased use of machinery, on about 3% work in the primary sector. 

Today most people work in **tertiary industries** – doing jobs that provide services to others, like working in shops, bus drivers, teachers. 18% of people are employed in the **secondary industries** in the manufacturing industry. 

The UK

A secondary industry in Wigan
